

## Soundtech audio kit for listening to your music outdoors

Listening to music outdoors has become truly simple. With Soundtech you can play the music you like from a Smartphone or tablet via Bluetooth, USB stick and FM radio.

The sound reproduction is controlled by wireless Evo Audio transmitter: you can select your favourite soundtrack or radio station at the simple touch of the handheld control.

Audio system, adjustable slats, awnings, screens, LED lighting and heating are always under control with a single wireless transmitter.

Transmitter suggested:  
**EVO AUDIO 7 or 42-channel**  
To get more information,  
see page 39.

## Soundtech Audio System

### Audio system (FM, Bluetooth, USB)

12/24 Vdc system for controlling audio sources via Bluetooth, FM radio or USB by wireless transmitter. The IP54 rated box makes it ideal for outdoor installation. It can be installed anywhere, even in very small spaces inside metal structures.

- Direct connection to the audio sources of your own Smartphone or tablet via Bluetooth, FM radio or USB
- Possibility of storing up to 4 FM radio stations
- Remote control with handheld Evo Audio 7 or 42 channel transmitter (more information on page 39)
