

SKYMAX PROCESS

OUR CORE APPROACH TO CREATING DISTINCTIVE PROJECTS IS A DIRECT RESULT OF WORKING COLLABORATIVELY WITH DEVELOPERS, ARCHITECTS, DESIGNERS, BUILDERS & END USERS.

Our process begins from initial contact to discuss your design Brief, at this time we will provide various design options before Submitting you budgets. Once we have fulfilled your design brief & achieved your budget we will submit our final proposal with Technical details & general arrangement drawings for your approval.

We understand each project has different site Requirements to deliver a successful project on time & to budget. Following describes in detail what each of the option includes.
 Skymax Inclusive – included is complete design assistance, starting with a design brief meeting in your office, onsite or at one of our showrooms, shop drawings, engineering, fabrication, project management & installation, through to project hand over.

Skymax Direct – design assistance from our in-house project team through to a fast-track delivery of your customised Skymax opening louvred roof system to you site. We provide comprehensive installation manuals, videos and site project management if required. This service is designed to utilise your labour onsite for the installation (or you to engage one of our trained local installers), the benefit is your project is costed at the lowest contract rate regardless of size of your project & fast-track delivery to site from order, ensuring your construction program & budget is achieved.

Skymax Dealer Network – understanding Australia's vastness Skymax has an Australia wide dealer network that is trained to offer a professional level of installation and after-market service for all small to medium commercial and residential projects.
