

## Design Intent Statement - Water Reticulation

---

**Product:** Aerotech Series – Opening Aluminium Louvred Roofs  
**Models:** Linear 195, Linear 215, Linear 235, Linear 255 and Linear 275  
**Company:** Skymax Australia Pty Ltd (1300 929 743- skymax.com.au)

Skymax Australia Pty Ltd makes no warranty, representation or guarantee regarding any change in the intended design of the Skymax - Aerotech Series Opening Aluminium Louvred Roof System.

In relation to the performance of the water reticulation, this will be significantly compromised if water dispersion is taken from a horizontal axis from the gutter profile and not using the Skymax Australia Pty Ltd specified product design intent, this specifically notes the correct dispersion of water from gutter profiles is to be dispersed vertically down from the gutter profile and not horizontally.

If the client does not complete the works or adhere to the Skymax Australia Pty Ltd Water Reticulation Specifications/Design Intent, then a build-up of water, over spray and or overflow of the water within the internal guttering system may occur.

The required number & size of downpipes spigots within the system is determined in accordance with the AS/NZS 3500.3.

Skymax Australia Pty Ltd does not warrant any leaks, overspray and or overflow of the gutters when or if the downpipe spigot design, fall in gutters and water dispersion/reticulation is not carried out strictly to the Skymax Australia Pty Ltd Water Reticulation Design Intent.
